Coffman Statement on the State of the Union

(WASHINGTON) - Congressman Mike Coffman (R-CO) released the following statement today in response to President Barack Obama's State of the Union address:

"The President pledged to improve the economy by lowering government barriers, but at the same time he tried to sell us on his plan for further 'investment' in our economy," Coffman said. "I'll call that as I see it: a codeword for billions of dollars of more spending and anyone can see that adding to the $14 trillion deficit will do nothing to create jobs or grow the economy."
