

Coffman Statement on August Unemployment Report

(WASHINGTON) - U.S. Rep. Mike Coffman, R-CO, released the following statement today after the Labor Department released its jobs report for August:

“Today’s dismal employment numbers are hugely disappointing, but I am not at all surprised by them. They are simply another sad indication that the Obama administration’s economic policies have failed. The president and his advisors need to reduce uncertainty and get private capital flowing to job creators by lowering the burdens on American businesses, instead of making it harder on them to create jobs.”
