

U.S. Rep. Mike Coffman, R-CO, issued the following statement today in response to President Barack Obama's State of the Union address:

"I appreciated the fact that he pledged his support for Israel and he clearly stated that he would put all options on the table when it comes to preventing Iran from obtaining a nuclear weapon, but I was disappointed in his economic agenda that relied on more government stimulus spending that hasn't done much to create jobs so far."
